

# Industrial HVAC is at its easiest when you have **support for life.**

We aren't a global conglomerate that dabbles across every technology. We live and breathe commercial and industrial HVAC, and build lifelong support systems for our customer because we believe in our products.

**Put simply:** the experience of doing business with Cambridge feels easier than you will find elsewhere. We are industry experts who guarantee your success, whether you are contracting on a building or own the building itself.

The most **energy efficient** industrial HVAC units on the market.

Sustainable community impact from your HVAC system.

Engineered systems designed to save energy & lower operational costs

Proprietary high-impact technology confirmed by the DOE for using less natural gas.

Localized rebate support from utilities.

Equipment that is **built to last.**

This capital investment will last decades longer than our competitors.

100% testing of all units before we ship.

Same or next day parts shipments.

Customer Support deployed for technical training, start ups or troubleshooting.

Our **team of experts** help you solve for the most complex facility conditions.

We know **high-bay buildings** and can help you solve for **IAQ & thermal comfort.**

Applications Engineering to navigate your application.

Local reps who know your climate and building standards.

Data-driven assistance for accurate system design & unit placement.

The **shortest lead times** in the industry.

Delivery dates you can rely on.

3-5 week lead times for our standardized units.

Same or next day parts shipments.
